Manual Testing

Test case

This test will verify the combat function, health and damage

Choose two bots with high health

The two bots with high health should win every time

Choose two bots with low attack

The two bots with low attack should lose every time

Bug report

A win does not count towards the total wins, it always counts towards losses

-Steps to reproduce

1.   Choose two bots with high health

2.   The result is a win but it counts toward a lost

-Expected result

A win should be added to total wins

-Actual result

A win is counted towards losses, happens every win

 See all bots does not display all bots

-Steps reproduce

1.   Click on "See All Bots"
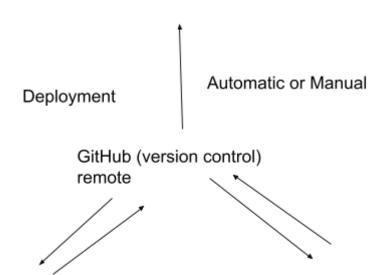

2.   Does not display all bots

-Expected result

Displays All Bots and their cards with name, health, attack damage

-Actual result

Does not display anything
